

Tool for Independence:

# Solar Water Pasteurizer

safe drinking water from the sun

Now water can be pasteurized and made safe to drink using only the heat of the sun

Electricity, fuel, chemicals or pressurized water are not required to disinfect drinking water

- ideal for remote or rural areas
- eliminates the need to boil water
- simple, reliable and long-lasting
- product life is 25+ years
- cost is 50 cents per person per year

Prevents illness and death caused by contaminated water  
Dramatically improves health of children and adults  
Installation is easy, operation is automatic  
Maintenance is minimal, no replacement parts needed

"At the primary school in Palo Grande (El Salvador), the average number of cases of diarrhea was 25 per day. Since the installation of the Solar Water Pasteurizer, the number cases have dropped to zero, contributing to much better health."

Tristram B. Johnson, El Salvador, February 18, 2000
